

Which educational programs have been successfully evaluated in valid research?

## Best Evidence Encyclopedia (BEE)

www.bestevidence.org

*Empowering Educators with Evidence on Proven Programs*

The BEE has answers to educators' questions, such as:

"Which educational programs are likely to raise my students' test scores?"

"Should I focus on instructional processes, computer-assisted instruction, or curricula to improve student achievement?"

"Where do I find an effective reading program for English Language Learners?"

The **Best Evidence Encyclopedia** presents reliable, unbiased reviews of research-proven educational programs for grades K-12.

### Program Areas Reviewed

- Mathematics (Elementary, Middle and High School)
- Reading (Upper Elementary, Middle and High School, English Language Learners)
- Comprehensive School Reform Models (Elementary, Middle and High School)
- Education Service Providers

### Site Features

- *Consumer Reports*®-style reviews of reading, math, ELL, and other programs
- Interviews with educators using research-proven programs
- Tools to support improvement teams, such as educator's summaries and two-page briefs
