## **CSRQ Center Report on Elementary School Comprehensive School Reform Models Educator's Summary Last Updated November 25, 2008**

Which comprehensive school reform programs have evidence of positive effects on elementary school achievement? To find out, this review summarizes evidence on comprehensive school reform (CSR) models in elementary schools, grades K-6. Comprehensive school reform models are programs used schoolwide to improve student achievement. They typically include the following elements:

- Innovative approaches to instruction and curriculum used in many subjects throughout the school
- Extensive, ongoing professional development, and coaches or facilitators in the building to help manage the reform process
- Measureable goals and benchmarks for student achievement
- Emphasis on parent and community involvement

CSR models are developed and supported by national organizations, mostly nonprofits, that provide professional development, materials, and support to networks of schools.

### **Key Findings**

Overall, 495 studies on 22 CSR models were identified initially relevant, 158 were eligible for full review, and 95 met standards. Of these, 72 were rated “conclusive,” and 23 were rated “suggestive.”

### **Program Ratings**

Listed below are currently available programs, grouped by strength of effectiveness. Within each group, programs are listed alphabetically.

#### **Very Strong Evidence of Effectiveness**

 None

### Moderately Strong Evidence of Effectiveness

Rating	Program	Description	Contact / Website
	Direct Instruction (Full immersion model)	Focuses on accelerating student performance using interactive, systematic, and explicit instruction supported by a system of data analysis and problem solving tightly linked to instruction.	E-mail: kengel@nifdi.org Website: www.nifdi.org

## Review Methods

For its quantitative analyses of overall achievement, CSRQ identified 22 CSR programs serving at least 20 schools in at least 3 states. They then did an extensive search for all types of studies that evaluated these programs. The evaluations' validity was rated as inconclusive, suggestive, or conclusive. Conclusive studies met the following criteria:

- Schools using each program had to be compared to equivalent control groups
- Schools had to have pretest scores or other baseline measures
- The outcome measures had to be reliable and valid
- The study duration had to be at least one year

To be considered “suggestive,” a study had to meet the same standards, but could have up to two “non-critical threats to validity.”

### *Program Ratings Basis*

CSR programs were rated in terms of the strength of their evidence of effectiveness in five categories:

 **Very Strong Evidence of Effectiveness:** At least 10 qualifying studies, with at least 5 rated “conclusive” and 75% of outcomes significantly positive, with an overall mean effect size of  $ES=+0.25$ . “Effect size” is the experimental-control difference divided by the standard deviation.

 **Moderately Strong Evidence of Effectiveness:** 5-9 qualifying studies, with at least 3 rated “conclusive,” and 51% to 75% of outcomes significantly positive, with an overall mean effect size of at least +0.15.

 **Moderate Evidence of Effectiveness:** 2-4 qualifying studies, with at least 1 rated “conclusive,” and 26% to 50% of outcomes significantly positive, with an overall mean effect size of at least +0.15.

 **Limited Evidence of Effectiveness:** 1 qualifying study, with 1-25% of outcomes significantly positive.

 **Zero Evidence of Effectiveness:** No qualifying outcomes were significantly positive.

CSRQ also looked at evidence in three additional areas:

- Additional student outcomes
- The model's design based on research
- Services and supports provided to schools
